Periodic Solutions of Population Models in a Periodically Fluctuating Environment	MONIQUE VASSEUR, GUY VAN MELLE, REGINE FRANGNE,
Enzyme Activation: Application to Intestinal Brush Border Sucrase	AND FRANCISCO ALVARADO (Meudon, France)
Enzyme Activation: Application to Intestinal Brush Border Sucrase	A Four-Proton-Families Model for pH-Dependent
Brush Border Sucrase Li (Los Alamos, New Mexico) Periodic Solutions of Population Models in a Periodically Fluctuating Environment Dagan Feng (Sydney, Australia) and Joseph J. Distepano III (Los Angeles, California) Decomposition-Based Qualitative Experiment Design Algorithms for a Class of Compartmental Models Michael G. Neubert and Mark Kot (Seattle, Washington) The Subcritical Collapse of Predator Populations in Discrete-Time Predator-Prey Models Jacques A. L. Silva and Thomas G. Hallam (Knoxville, Tennessee) Compensation and Stability in Nonlinear Matrix Models Gila Fruchter and Shlomo Ben-Haim (Haifa, Israel) Dynamic Properties of Cardiovascular Systems Jiao Zhaorong, Kenan M. Matawie, and Clyde A. McGilchrist (New South Wales, Australia) Variance Components for Discordances L. Turyn (Dayton, Ohio) Remarks on "Persistence in Models of Three Interacting Predator-Prey Populations" Edward H. Kaplan (New Haven, Connecticut) Ro Bounds for Worst-Case Endemic Mixing Models 131 Book Reviews	Enzyme Activation: Application to Intestinal
